Education

UNIVERSITY OF CALIFORNIA, LOS ANGELES

Linguistics and Computer Science BA, 3.9 GPA

Los Angeles, CA

2025-Present

FOLSOM LAKE COLLEGE

Computer Science, 4.0 GPA

Transferred in one year.

Relevant Coursework: Computer Architecture and Assembly Language, Data Structures, Discrete Structures, Calculus III, Linear Algebra, Object-Oriented Programming in C++

Folsom, CA

2024-2025

OAK RIDGE HIGH SCHOOL

Graduated in 3 years. 4.3 GPA.

El Dorado Hills, CA

2021-2024

Experience

RealXP Lab

Unity Gameplay Prototyping Extern

2025

- Developed gameplay features in an agile environment with weekly sprint cycles, delivering playable builds for 5 consecutive iterations
- Collaborated with a 10-member programming team
- Participated in structured code review processes, both presenting work for peer feedback and reviewing teammates' implementations to maintain code quality
- Programmed camera logic, UI/UX, and made 6+ pull requests to fix bugs
- Used professional source control practices including trunk-based development, feature branches, pull requests, file locking, and merge conflict resolution in Git and Bitbucket

spotcheck.lol

Full-Stack Developer

2025-Present

- Programmed, designed, and deployed a full-stack web application for TFT puzzles using Next.js, React, and Firebase in collaboration, reaching 10,000+ users
- Implemented an admin dashboard in collaboration with the puzzle designer, streamlining puzzle creation for 30+ puzzles
- Used Vercel Analytics and community feedback to iterate on UI/UX improvements and resolve bugs
- Integrated third-party MetaTFT API through direct communication with the developer
- Developed Python scripts for web scraping and data processing to refine game information and supplement API data

Lyin' Jack

Lead Programmer

2025

- Gamecrafters Collective Summer Jam Winner made in Unity
- Built 15+ game systems including event-driven state machine and DOTween animation pipeline
- Implemented dynamic rule modification system and polished betting system with drag & drop chips
- Collaborated with sound designer, 2D artist, UI designers and programmers using a Kanban board

5 Second Rule

Lead Programmer

2025

- Made for Ludum Dare 58 in Unity
- Collaborated in designing a complete 2D wave-based survival game in a 48-hour game jam
- Programmed player combat, powerup, UI, and enemy spawning systems
- Led and helped programmers who were new to game development with bug resolution and Git

FLC++

Folsom, CA

President

2024-2025

- Updated and wrote documentation for Folsom Lake College's official Discord Bot using Python and Gemini AI
- Led 4 club projects throughout the year, including publishing a Chrome extension in JavaScript
- Led an advertising campaign and organized meetings to triple club membership by the end of year

Pokedrafter

Full Stack Developer

2024-2025

- Used React, TypeScript, Next.js, and Javascript for frontend development
- Used Git for version control, Firebase as a backend, Node.js to integrate component libraries, and Figma for visual design prototypes
- Implemented RESTful API calls to APIs such as pokedata.ovh while ensuring efficient state management and an expandable structure in the database.
- Handled marketing and user support for 150+ players

Teaching

Tutor/Coach

2021-Present

- Worked and volunteered as an academic tutor for math and SAT
- Consistently increased grades for struggling students by at least a letter grade
- Coached competitive Pokemon card game players to international success, with one student reaching top 10 in the world

Skills

Technical: Python, C++, C#, Unity, HTML/CSS, React, Git, PC Building and Repair, Teaching

Language: Bilingual Proficiency in English and Mandarin. B2 in French.
