Education

UNIVERSITY OF CALIFORNIA, LOS ANGELES

Linguistics and Computer Science BA, 3.8 GPA

Los Angeles, CA

2025-Present

FOLSOM LAKE COLLEGE

Computer Science, 4.0 GPA

Transferred in one year.

Relevant Coursework: Computer Architecture and Assembly Language, Data Structures, Discrete Structures, Calculus III, Linear Algebra, Object-Oriented Programming in C++

Folsom, CA

2024-2025

OAK RIDGE HIGH SCHOOL

Graduated in 3 years. 4.3 GPA.

El Dorado Hills, CA

2021-2024

Experience

RealXP Lab

Unity Gameplay Prototyping Extern

2025

- Developed gameplay features in an Agile environment with weekly sprint cycles and a Kanban board, delivering playable builds for 5 consecutive iterations
- Participated in structured code review ceremonies with a 10-member team, both presenting work for peer feedback and reviewing teammates' implementations to maintain code quality
- Collaborated with external sound designer, coordinating implementation of 40+ sound effects
- Used professional source control practices including trunk-based development, feature branches, pull requests, file locking, and merge conflict resolution in Git and Bitbucket

spotcheck.lol

Full-Stack Developer

2025-Present

- Programmed and designed a full-stack web application for TFT puzzles with a content creator that reached 10,000+ users using React, Firebase, and Next.js
- Implemented an admin dashboard, streamlining puzzle creation for 30+ puzzles
- Used Vercel Analytics and community feedback to iterate on UI/UX improvements and resolve bugs
- Integrated third-party MetaTFT API through direct communication with the developer
- Developed Python scripts for web scraping and data processing to refine game information and supplement API data

5 Second Rule

Lead Programmer

2025

- Made for Ludum Dare 58 in Unity
- Led development of a complete 2D wave-based survival game in a 48-hour game jam
- Coordinated asset production priorities with artists and sound designers to ensure programmers received basic assets for system implementation
- Managed timeline and delegated tasks using a Kanban board, ensuring all art, music, and programming was done on schedule
- Provided hands-on support to other programmers and UI designers who were new to game development with bug resolution and Git workflow so that everyone could contribute

Lyin' Jack

Lead Programmer

2025

- Gamecrafters Collective Summer Jam Winner
- Led cross-functional team of sound designer, 2D artist, UI designers, and programmers
- Built 15+ game systems including event-driven state machine and DOTween animation pipeline
- Applied Agile practices to coordinate team activities and complete features on deadline

ACM Studio @ UCLA

Intern

2025-Present

- Helping plan and present educational game development workshops for UCLA's game development club to 20+ students each week
- Building resources on the club website to help new game developers overcome common game jam obstacles

FLC++

Folsom, CA

President

2024-2025

- Planned and presented 16+ weekly lessons on game development and web development
- Led 4 club projects throughout the year, including publishing a Chrome extension in JavaScript
- Drove membership growth through advertisement and outreach, successfully tripling club size

Pokedrafter

Full Stack Developer

2024-2025

- Used React, TypeScript, Next.js, and Javascript for frontend development
- Used Git for version control, Firebase as a backend, Node.js to integrate component libraries, and Figma for visual design prototypes
- Implemented RESTful API calls to APIs such as pokedata.ovh while ensuring efficient state management and an expandable structure in the database
- Supported community of 150+ users through social media and direct communication

Teaching

Tutor/Coach

2021-Present

- Worked and volunteered as an academic tutor for math and SAT
- Consistently increased grades for struggling students by at least a letter grade
- Coached competitive Pokemon card game players to international success, with one student reaching top 10 in the world

Skills

Agile ceremonies, Kanban boards, sprint planning, code reviews, Unity, C#, React, TypeScript, Next.js, Firebase, Git, Bitbucket, Figma, Python, C++, RESTful APIs, Node.js

Languages

Bilingual Proficiency in English and Mandarin. B2 in French.
